Instant hot and chilled
water system

TopWater Hot & Cold

**Energy-efficient flash heater**

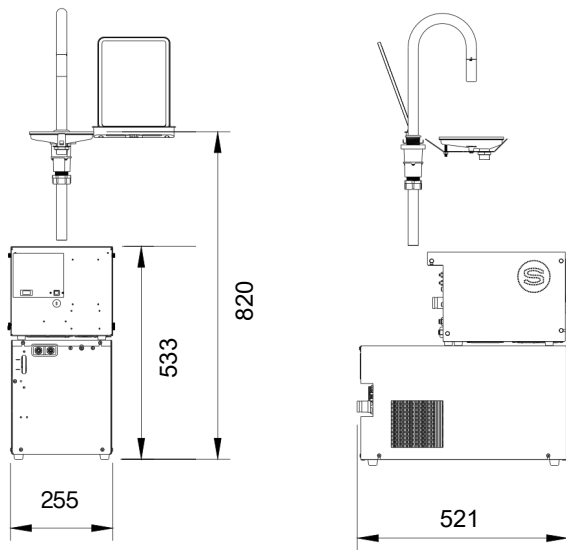

Dual-coil flash heater technology keeps energy use low by heating water only when needed. From standby, TopWater is ready to serve hot water in just 45 seconds — and during normal use, hot water is delivered instantly.

A flexible water system for chilled, sparkling and instant hot water

TopWater is a professional filtered water dispenser system designed for workplaces, hospitality, retail and shared spaces where performance, design and everyday convenience matter. The range offers chilled still water, sparkling water, and instant hot water across flexible configurations—from dedicated cold-water solutions to fully integrated hot- and chilled-water systems.

With its compact under-counter design, TopWater keeps worktops clean and minimal while delivering high-capacity filtered water on demand. Choose from different control options based on the configuration and match the faucet finish to the surrounding interior or to other Scanomat equipment.

Whether the priority is clean hydration, reducing single-use plastic, premium guest service, or efficient tea and hot water preparation, TopWater brings professional water dispensing into one elegant, scalable system.

TopWater Hot & Cold

Flexible configurations

Choose between Cold, Hot or Hot & Cold depending on the required drink menu and installation setup.

Sustainable alternative

Designed to support refill culture, reduce single-use plastic and lower waste in professional environments.

High-capacity performance

45 l/hour for chilled water and 30 l/hour for hot water.

Premium design integration

Minimal under-counter system with elegant faucet design and multiple finish options to match interiors and other Scanomat drink solutions.

TopWater is available in dedicated cold, dedicated hot and combined hot & cold configurations.

All versions are designed for filtered water and professional use, with control and dispensing options adapted to the installation and user environment.
